Objective

Software Engineer with 5+ years of experience in React.js, Next.js, and TypeScript, building scalable frontend systems and full-stack product features. Experienced in reusable component architecture, performance optimization, REST API integration, and cross-functional delivery with Node.js/Ruby on Rails backends. Open to Frontend and Full Stack roles focused on product impact, system scalability, and engineering excellence.

Experience

Surya Web Solutions

July 2026 to Present

Project Lead / Software Engineer

- **Simpson Travel Flight Change Platform**
  Surya Web Solutions × Wingspan Technology
  Led and built an AI-driven flight-change notification platform with Next.js, Azure, and TigerBay API integration, replacing a paid third-party service for Simpson Travel.
- **Bloom Hotels HR Screening Voice Agent**
  Wingspan Technology
  Extended a Retell AI and n8n candidate-screening voice agent with bilingual English/Hindi support, including language routing and hybrid geocoding/LLM location normalization.
- **Blanco Niño Order Automation**
  Wingspan Technology
  Building an order automation platform for Blanco Niño, with Gmail, Streak and DIOMAC integrations.

Danphe Software Labs Pvt Ltd

Feb 2023 to July 2026

Software Engineer - Frontend Systems

- Built and optimized core e-commerce experiences in React + Ruby on Rails, including cart, multi-payment checkout, and real-time form preview to improve conversion and user experience.
- Built a Shopify-like multi-tenant theme platform with a visual editor, reusable blocks, schema-driven templates, and live preview capabilities, enabling faster storefront setup and scalable customization.
- Integrated frontend systems with REST APIs using TypeScript + Zod validation, asynchronous data handling, and robust state synchronization to improve data integrity and reduce production defects.
- Improved React Native app performance and stability by resolving high-priority production issues, optimizing rendering behavior, and enhancing critical mobile UI/UX issues.
- Contributed to a pnpm + Turborepo monorepo for multiple Next.js applications, building shared UI, hooks, and API client packages to increase code reuse, CI efficiency, and release scalability.

Experience, continued

Nassec.io May 2021 to May 2023

Frontend Developer

- Built a timezone-aware subscription billing and e-payment system using Vue.js and Pinia, enabling secure and reliable transaction workflows across regions.
- Developed an interactive security analysis dashboard for URL scanning, vulnerability tracking, scheduled scans, and report generation to improve security operations visibility.
- Implemented RBAC and subscription-tier feature gating for multi-user environments, and integrated frontend workflows with backend APIs for consistent data flow and state management.

Finnove Technology Jan 2021 to May 2021

Intern/Trainee

- Developed an internship marketplace platform connecting applicants and providers, streamlining job postings, application workflows, and status tracking through an intuitive web interface.

Skills

- **Languages:** JavaScript (ES6+), TypeScript
- **Frontend:** React.js, Next.js, Vue.js, Nuxt.js, React Native, HTML5, CSS3, Tailwind CSS
- **State & Data:** React Query (TanStack Query), Pinia, Zustand, REST APIs, Zod Validation
- **Backend & APIs:** Node.js, API Integration, Authentication/Authorization (RBAC)
- **Databases:** PostgreSQL, MongoDB
- **Testing:** Unit Testing, Integration Testing, Playwright, Jest
- **DevOps & Tools:** Git, CI/CD, Docker, pnpm Workspaces, Turborepo
- **Engineering Focus:** Component Architecture, Monorepo Architecture, Performance Optimization, Responsive Design

Education

Trichandra Multiple Campus 2018 to 2023

Bachelor in Science, Physics
